NFAT OMR Based Mock Test M.Sc. Cyber Security & DFIS

1. Which protocol provides security at the network layer?
 - a) SSL
 - b) IPSec
 - c) SSH
 - d) TLS
2. Which TCP flag is used to initiate a connection?
 - a) FIN
 - b) ACK
 - c) SYN
 - d) RST
3. What is the main advantage of using VLANs in networking?
 - a) Increased bandwidth
 - b) Reduced network security
 - c) Improved network segmentation
 - d) Faster routing decisions
4. Which of the following is NOT a type of network topology?
 - a) Star
 - b) Mesh
 - c) Circular
 - d) Bus
5. Which memory allocation strategy results in the least amount of fragmentation?
 - a) First Fit
 - b) Best Fit
 - c) Worst Fit
 - d) Next Fit
6. What is the primary purpose of the kernel in an operating system?
 - a) Managing user accounts
 - b) Controlling hardware and system resources
 - c) Running application software
 - d) Managing external devices only

NFAT Prep India (NPI)

7. Which of the following is NOT a valid process state?
 - a) Ready
 - b) Executing
 - c) Suspended
 - d) Terminated

8. What is the main disadvantage of a monolithic kernel?
 - a) Difficult to modify and maintain
 - b) Poor performance
 - c) Cannot handle multiple processes
 - d) Uses too little memory

9. Which of the following is a self-balancing binary search tree?
 - a) AVL Tree
 - b) Heap
 - c) B-Tree
 - d) Red-Black Tree

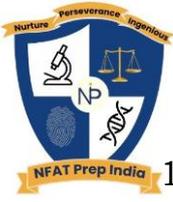

10. What is the space complexity of Merge Sort?
 - a) $O(1)$
 - b) $O(n)$
 - c) $O(\log n)$
 - d) $O(n \log n)$

11. A circular queue prevents which problem in a normal queue?
 - a) Overflow
 - b) Underflow
 - c) Wastage of memory
 - d) Sorting

12. In graph traversal, which algorithm guarantees the shortest path in an unweighted graph?
 - a) DFS
 - b) BFS
 - c) Dijkstra's Algorithm
 - d) Floyd-Warshall Algorithm

13. What does the JNZ instruction do in assembly?
 - a) Jump if zero
 - b) Jump if not zero
 - c) Jump if negative
 - d) Jump to the next instruction

NFAT Prep India (NPI)

14. In x86 assembly, what is the role of the RET instruction?
 - a) Return from a function by restoring the saved instruction pointer
 - b) Reset the CPU registers
 - c) Repeat a loop execution
 - d) Restore the stack pointer
15. What does the XOR AX, AX instruction do?
 - a) Sets AX to 0
 - b) Copies AX to another register
 - c) Performs bitwise XOR with a memory address
 - d) Inverts all bits of AX
16. Which instruction shifts all bits of a register to the left, filling the LSB with zero?
 - a) SHR
 - b) SHL
 - c) ROL
 - d) SAR
17. What does the term RAII stand for in C++?
 - a) Resource Allocation Isolated Instance
 - b) Resource Allocation Is Initialization
 - c) Random Access Inheritance Implementation
 - d) Recursive Algorithm Implementation
18. Which of the following describes the use of virtual destructors in C++?
 - a) They ensure proper cleanup in an inheritance hierarchy
 - b) They prevent memory leaks
 - c) They prevent function overloading
 - d) They improve program performance
19. How does `std::move` improve performance in C++?
 - a) Enables efficient resource transfer by avoiding unnecessary copies
 - b) Increases the size of the object
 - c) Forces the compiler to create new objects
 - d) Locks objects for thread safety

NFAT Prep India (NPI)

20. Main difference between deep copy and shallow copy in C++?
- Shallow copy only copies pointers, deep copy duplicates entire objects
 - Deep copy is faster
 - Shallow copy allocates new memory
 - No difference
21. How is an array passed to a function in C?
- By value
 - By reference
 - By pointer
 - Both b and c
22. Which operator has the highest precedence in C?
- * (Multiplication)
 - ++ (Increment)
 - () (Parentheses)
 - && (Logical AND)
23. What is the purpose of the volatile keyword in C?
- Prevent compiler optimizations on a variable
 - Make a variable constant
 - Define a global variable
 - Allocate memory dynamically
24. What will be the output of the following code?

C

```
CopyEdit
```

```
#include <stdio.h>
```

```
Int main () {
```

```
Char *ptr= "Hello";
```

```
Printf("%c", *(ptr + 3)) ;
```

```
Return 0;
```

```
}
```

- H
- e
- l
- o

NFAT Prep India (NPI)

25. What will happen if you declare the main method as private in Java?
- Compilation error
 - Runtime error
 - No error, executes normally
 - JVM cannot access main
26. Which statement about Java's final keyword is correct?
- A final method cannot be overridden
 - A final class cannot be extended
 - A final variable cannot be reassigned
 - All of the above
27. Which keyword refers to the parent class in Java?
- parent
 - this
 - super
 - base
28. What happens if you define a constructor in an interface?
- Compilation error
 - Runtime error
 - It will execute normally
 - Constructor will be inherited
29. What is the default access modifier for a class in C#?
- public
 - private
 - internal
 - protected
30. Which .NET feature ensures cross-language interoperability?
- Common Language Specification (CLS)
 - Common Intermediate Language (CIL)
 - JIT Compilation
 - Windows Communication Foundation (WCF)
31. Primary purpose of ASP.NET MVC?
- Execute JavaScript on client
 - Manage SQL Server databases
 - Build web apps using Model-View-Controller architecture
 - Replace Windows Forms

NFAT Prep India (NPI)

32. What is the use of Reflection in .NET?

- a) Execute unmanaged code
- b) Inspect and manipulate metadata
- c) Improve performance
- d) Generate random numbers

33. Output of this code in Python?

```
print("Hello" * 3)
```

- a) HelloHelloHello
- b) 3Hello
- c) Error
- d) Hello Hello Hello

34. What does the zip() function do in Python?

- a) Combines lists into a dictionary
- b) Iterates over multiple iterables as tuples
- c) Sorts two lists together
- d) Compresses files into ZIP archive

35. What is the output of the following Python code?

```
CopyEdit
```

```
a = [1, 2, 3, 4]
```

```
print(a[-1])
```

- a) 4
- b) 1
- c) -1
- d) Error

36. Which of the following Python data types is mutable?

- a) Tuple
- b) String
- c) List
- d) Integer

37. What is denormalization in databases?

- a) Reduce redundant data
- b) Introduce redundancy for faster performance
- c) Split into multiple tables
- d) Ensure referential integrity

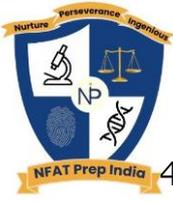

NFAT Prep India (NPI)

38. Which is a disadvantage of using indexes in a database?
- Increased query speed
 - Increased storage usage
 - Decreased data consistency
 - Reduced referential integrity
39. What does the cascade option in foreign key constraints do?
- Prevents deletion of referenced records
 - Automatically deletes/updates dependent records
 - Disables integrity constraints
 - Duplicates the data
40. Which technique prevents dirty reads in a database?
- Shared locking
 - Exclusive locking
 - Snapshot isolation
 - Optimistic concurrency control
41. Which organization is responsible for global IP address allocation?
- ICANN
 - IEEE
 - W3C
 - IETF
42. Protocol used for sending emails from client to server?
- IMAP
 - POP3
 - SMTP
 - FTP
43. What is the default port for HTTPS?
- 21
 - 443
 - 80
 - 53

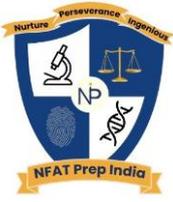

NFAT Prep India (NPI)

44. Protocol for secure remote login?
- Telnet
 - SSH
 - RDP
 - HTTP
45. In synchronous counters, flip-flops are triggered:
- Sequentially
 - Asynchronously
 - Simultaneously
 - Randomly
46. Which of the following is a universal gate?
- XOR
 - NAND
 - AND
 - OR
47. Minimum number of NAND gates needed to make an OR gate?
- 1
 - 2
 - 3
 - 4
48. A shift register is used for:
- Arithmetic operations
 - Data storage
 - Serial-to-parallel conversion
 - All of the above
49. Default HTTP status code for a successful GET request?
- 200
 - 201
 - 204
 - 404
50. In CSS, which property creates a flexbox container?
- display: flex;
 - position: absolute;
 - align-items: center;
 - justify-content: flex-start;

NFAT Prep India (NPI)

51. In JavaScript, what does Promise.all([p1, p2, p3]) return?
- The first resolved promise
 - A single promise that resolves when all resolve
 - An array of promises
 - It runs promises in sequence
52. Which HTML attribute requires a field before form submission?
- validate
 - required
 - mustfill
 - mandatory
53. Federated Learning in AI is designed to:
- Process data on cloud servers
 - Train models without sharing raw data
 - Reduce neural network size
 - Speed up blockchain transactions
54. 6G networks are expected to introduce:
- Reduced need for cloud computing
 - AI-driven intelligent networks
 - Replacement of fiber-optic cables
 - Eliminate latency completely
55. Advantage of graphene-based transistors?
- Increased battery life
 - High speed with low energy use
 - Better display quality
 - Reduced quantum interference
56. The Turing Test evaluates:
- Machine learning model accuracy
 - Human-like AI intelligence
 - Network efficiency
 - Quantum computing power
57. Design Patterns in software engineering are used to:
- Increase code redundancy
 - Solve common design problems
 - Improve database efficiency
 - Create user interfaces

NFAT Prep India (NPI)

58. Which of these is **not** a non-functional requirement?
- Performance
 - Security
 - Maintainability
 - User authentication
59. Mutation Testing is used to:
- Measure maintainability
 - Introduce small code changes to test robustness
 - Improve database security
 - Check syntax errors
60. Which methodology is linear and sequential?
- Agile
 - Waterfall
 - Spiral
 - RAD
61. In prototyping, the main purpose of the prototype is to:
- Replace final system
 - Refine requirements
 - Test system security
 - Eliminate documentation
62. A Data Dictionary is:
- Used for spell-checking
 - A repository of data definitions
 - A table of functional modules
 - A list of database primary keys
63. Use Case Diagrams are used to:
- Define database schemas
 - Show user interactions with the system
 - Define system architecture
 - Replace flowcharts
64. In OOD, which technique reduces component dependency?
- Encapsulation
 - Redundancy
 - Global Variables
 - Code Duplication

NFAT Prep India (NPI)

65. CPI (Clock Cycle per Instruction) depends on:
- Only clock frequency
 - Only instruction set architecture
 - Both instruction set and CPU design
 - Only number of registers
66. Principle of locality in cache memory says:
- Programs access data sequentially
 - Data accessed once isn't accessed again
 - Large programs need less cache
 - Main memory is faster
67. Main advantage of a superscalar processor:
- Execute multiple instructions per cycle
 - Simpler instruction set
 - Lower power consumption
 - No need for pipelining
68. Virtual address space of a 64-bit processor is:
- 64 GB
 - 16 TB
 - 4 PB
 - 18 EB
69. Number of bits required to represent 256 states?
- 8
 - 10
 - 16
 - 4
70. Fastest logic family in switching speed?
- TTL
 - CMOS
 - ECL
 - DTL
71. Address lines for a $16K \times 8$ memory chip?
- 10
 - 12
 - 14
 - 16

NFAT Prep India (NPI)

72. Maximum count of a 4-bit up/down counter?
- 8
 - 15
 - 16
 - 31
73. The Halting Problem is:
- Decidable
 - Undecidable
 - Regular language
 - Solvable by finite automaton
74. Which operations are closed in regular languages?
- Complement
 - Intersection
 - Concatenation
 - All of the above
75. Language accepted by finite automaton is always:
- Recursive
 - Regular
 - Context-free
 - Recursively enumerable
76. Which grammar is **not** accepted by a deterministic pushdown automaton (DPDA)?
- Ambiguous context-free grammar
 - Regular grammar
 - Unambiguous context-free grammar
 - Right-linear grammar
77. Find the missing number: 3, 6, 11, 18, 27, ?
- 35
 - 36
 - 38
 - 39
78. Identify the missing term: 81, 27, 9, 3, ?
- 1
 - 2
 - 0
 - 3

NFAT Prep India (NPI)

79. Find the next number: 7, 14, 28, 56, ?
- 98
 - 84
 - 112
 - 86
80. What is the missing number? 11, 22, 33, ?, 55
- 40
 - 44
 - 45
 - 47
81. Which sentence is in **present continuous tense**?
- She writes a letter.
 - She has written a letter.
 - She is writing a letter.
 - She will write a letter.
82. Identify the error: "Each of the students have a book."
- "Each" should be replaced with "All"
 - "Have" should be replaced with "Has"
 - "Students" should be "Student"
 - No error
83. Passive voice of: "She wrote a letter."
- A letter was written by her.
 - A letter is written by her.
 - A letter will be written by her.
 - A letter has been written by her.
84. Which sentence is in **past perfect continuous tense**?
- They had been waiting for the bus for an hour.
 - They waited for the bus.
 - They are waiting for the bus.
 - They will have waited for the bus.
85. Which is the **smallest country** in the world by land area?
- Monaco
 - San Marino
 - Vatican City
 - Liechtenstein

NFAT Prep India (NPI)

86. What is the **hardest natural substance** on Earth?
- Platinum
 - Diamond
 - Graphene
 - Titanium
87. Which **ocean is the deepest**?
- Atlantic Ocean
 - Arctic Ocean
 - Indian Ocean
 - Pacific Ocean
88. Which country has the **most pyramids**?
- Egypt
 - Sudan
 - Mexico
 - Peru
89. A sum becomes **2.25 times** in 2 years at compound interest. What is the rate?
- 25%
 - 50%
 - 30%
 - 40%
90. A shopkeeper increases the price by 25% and gives 20% discount. Net effect?
- 0%
 - 2% increase
 - 5% increase
 - 10% increase
91. If CAT = 24, DOG = 26, what is FISH?
- 42
 - 44
 - 46
 - 48

NFAT Prep India (NPI)

92. A can complete a task in 20 days, B in 30 days. How much in 5 days together?
- 1/4
 - 1/3
 - 1/2
 - 2/3
93. If matrix A is diagonalizable, then:
- A has real eigenvalues
 - A has a full set of linearly independent eigenvectors
 - A is symmetric
 - $A^T = A^{-1}$
94. If the rank of a 4×5 matrix is 3, what is the dimension of its null space?
- 2
 - 1
 - 3
 - 5
95. A symmetric matrix is always:
- Diagonalizable
 - Singular
 - Invertible
 - Unitary
96. If A and B are invertible, which is true?
- $(AB)^{-1} = A^{-1}B^{-1}$
 - $(AB)^{-1} = B^{-1}A^{-1}$
 - $A^{-1}B^{-1} = B^{-1}A^{-1}$
 - $AB = I$
97. Who was the **first Indian Nobel laureate**?
- C.V. Raman
 - Rabindranath Tagore
 - Mother Teresa
 - Amartya Sen
98. ISRO headquarters is in:
- Chennai
 - Bengaluru
 - Hyderabad
 - Thiruvananthapuram

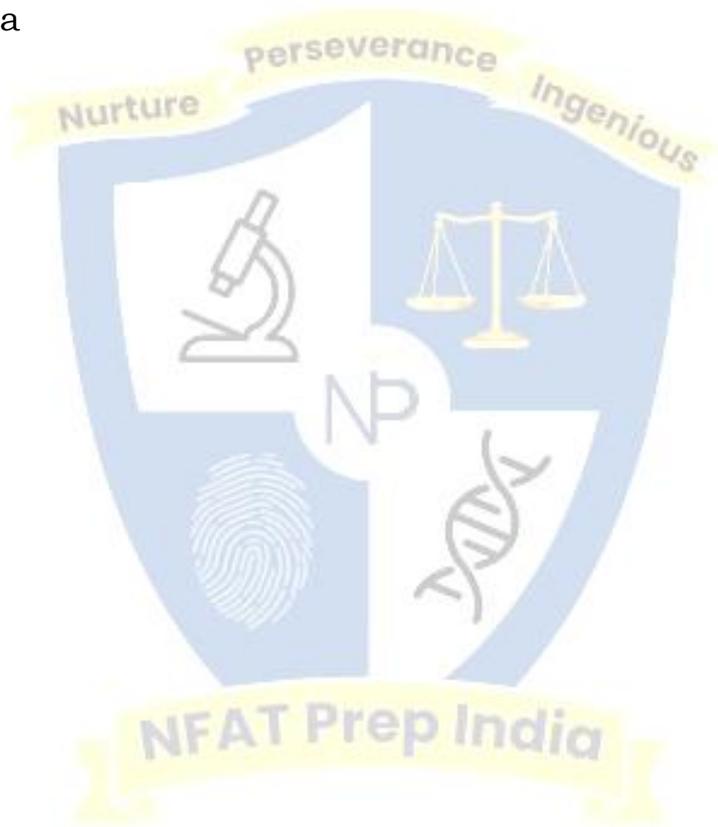

NFAT Prep India (NPI)

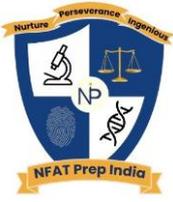

99. First general elections in independent India were held in:

- a) 1947
- b) 1950
- c) 1951–52
- d) 1955

100. Kaziranga National Park is in:

- a) West Bengal
- b) Assam
- c) Arunachal Pradesh
- d) Odisha

NFAT Prep India (NPI)

✓ Answers

1. b) IPsec
2. c) SYN
3. c) Improved network segmentation
4. c) Circular
5. b) Best Fit
6. b) Controlling hardware and system resources
7. b) Executing
8. a) Difficult to modify and maintain
9. a) AVL Tree
10. b) $O(n)$
11. c) Wastage of memory
12. b) BFS
13. b) Jump if not zero
14. a) Return from a function
15. a) Sets AX to 0
16. b) SHL
17. b) Resource Allocation Is Initialization
18. a) Ensure proper cleanup
19. a) Avoiding unnecessary copies
20. a) Shallow copies pointers
21. d) Both b and c
22. c) () (Parentheses)
23. a) Prevent compiler optimizations
24. d) o
25. d) JVM cannot access main

NFAT Prep India (NPI)

26. d) All of the above
27. c) super
28. a) Compilation error
29. c) internal
30. a) Common Language Specification (CLS)
31. c) Build web apps using MVC
32. b) Inspect and manipulate metadata
33. a) HelloHelloHello
34. b) Iterates over iterables as tuples
35. a) 4
36. c) List
37. b) Introduce redundancy
38. b) Increased storage usage
39. b) Automatic deletion/update
40. b) Exclusive locking
41. a) ICANN
42. c) SMTP
43. b) 443
44. b) SSH
45. c) Simultaneously
46. b) NAND
47. b) 2
48. d) All of the above
49. a) 200
50. a) display: flex;
51. b) A single promise that resolves when all resolve
